REAL-TIME ®
Lock Out Procedure Management In the Cloud

Take your program management "To the Cloud":

- *REAL-TIME®* allows you to manage your Lock Out-Tag Out program with ease by tracking work activities and worker use of procedures in real time!
- With *REAL-TIME®* (powered by the electrical safety pros at Stark Safety Consultants), your energy control and isolation program can move beyond mere lockout devices and stickers that cover your mechanical and electrical applications into a comprehensive program that details every instance and update.
- The best part? It does it all in "real time"! *REAL-TIME®* eliminates the second-guessing that can sometimes accompany traditional LOTO procedures. You'll always know the exact, up-to-the-minute status of your mechanical equipment and energy control procedures as well activities actually in progress as they happen.

What you get with *REAL-TIME®*
