

Lockout/Tagout for Authorized Persons

2-HOUR COURSE OVERVIEW

This course is designed for employees and affiliates who work on or near equipment with exposed hazardous energy.

This includes all maintenance, modification, calibration, and repair functions.

The course is designed to provide participants with training on Lockout/Tagout responsibilities, acceptable practices, and procedures with respect to safety and compliance. The course stresses specific approved techniques, tools, equipment, and line management and supervision responsibilities.

Course References OSHA 1910.147, 1910.333, 2021 NFPA 70E

Course Outline:

- Identify requirements for performing Lockout/Tagout
- Identify conditions that require Lockout/Tagout
- Differentiate between Affected Person, Authorized Person, and Qualified Person
- Recall the order of simple LOTO procedure steps
- Differentiate between simple and complex LOTO
- Explain the elements in a complex LOTO procedure
- Identify four exceptions to LOTO
- Group LOTO methods
- Sample LOTO procedure template examples

Attendees will be asked to demonstrate what they have learned from the practical training by taking an online course exam.

Completion to a successful level of 80% or higher required for course achievement certificate.
